We love the ride

Everything here is a passion project We work with cool clients doing Important things, and we wouldn't have it any other way

We move quickly

They're called sprints for a reason while others are waiting for the ink to dry on a proposal, we're already knee deep into prototyping

We have no B team.

16 individuals passionate for results. Our dedication to each other is the fuel that powers us through late nights and big challenges

We play for keeps.

Once we commit, we go all-in. Our clients come & sit side-by-side to flesh out new features or just enjoy our endless supply of coffee

We keep it real.

Never settle for the status quo We daydream in pixels, obsess about technology, and fall asleep with fresh ideas still racing in mind

We vet each idea.

We don't just build whatever We create the kind of products that matter, that are remembered, that people rely upon & we do it with style

We stay lean.

Let's remain sketchy We fundamentally believe that you need structured chaos to do anything worthwhile

We push limits.

We are on a quest for greatness Every idea, decision, or line of code is an opportunity to push ourselves, our work, and what's possible

THE DIFFERENCE

I basically used NASBIX TECHNOLOGIES for front-end engineering service. I was just amazed at the value, money and the time was super-fast. I am definitely going to use WordPress sites.

CEO – Aftab, Genny Cosmetics

I have been working consistently on a variety of projects mainly PSD to WordPress. I have worked with Faheem in the past and now I am working with Owais. Each time they deliver the project, their hour surpasses my expectations.

CEO - Hafeez, Mr.Online

I had a great conversation with them to redesign my website. I assigned a Theme to NASBIX TECHNOLOGIES and they responded quickly and created wonderful theme for me that was not easy to do.

CEO – Sadiq Jangda, BorTec

I was looking for a Company to complete my WordPress project from CSS3 design. I found NASBIX TECHNOLOGIES, they were quick to respond my questions and provided a nice product to me. I highly recommend them.

CEO - Muhammad, Al-Nakheel

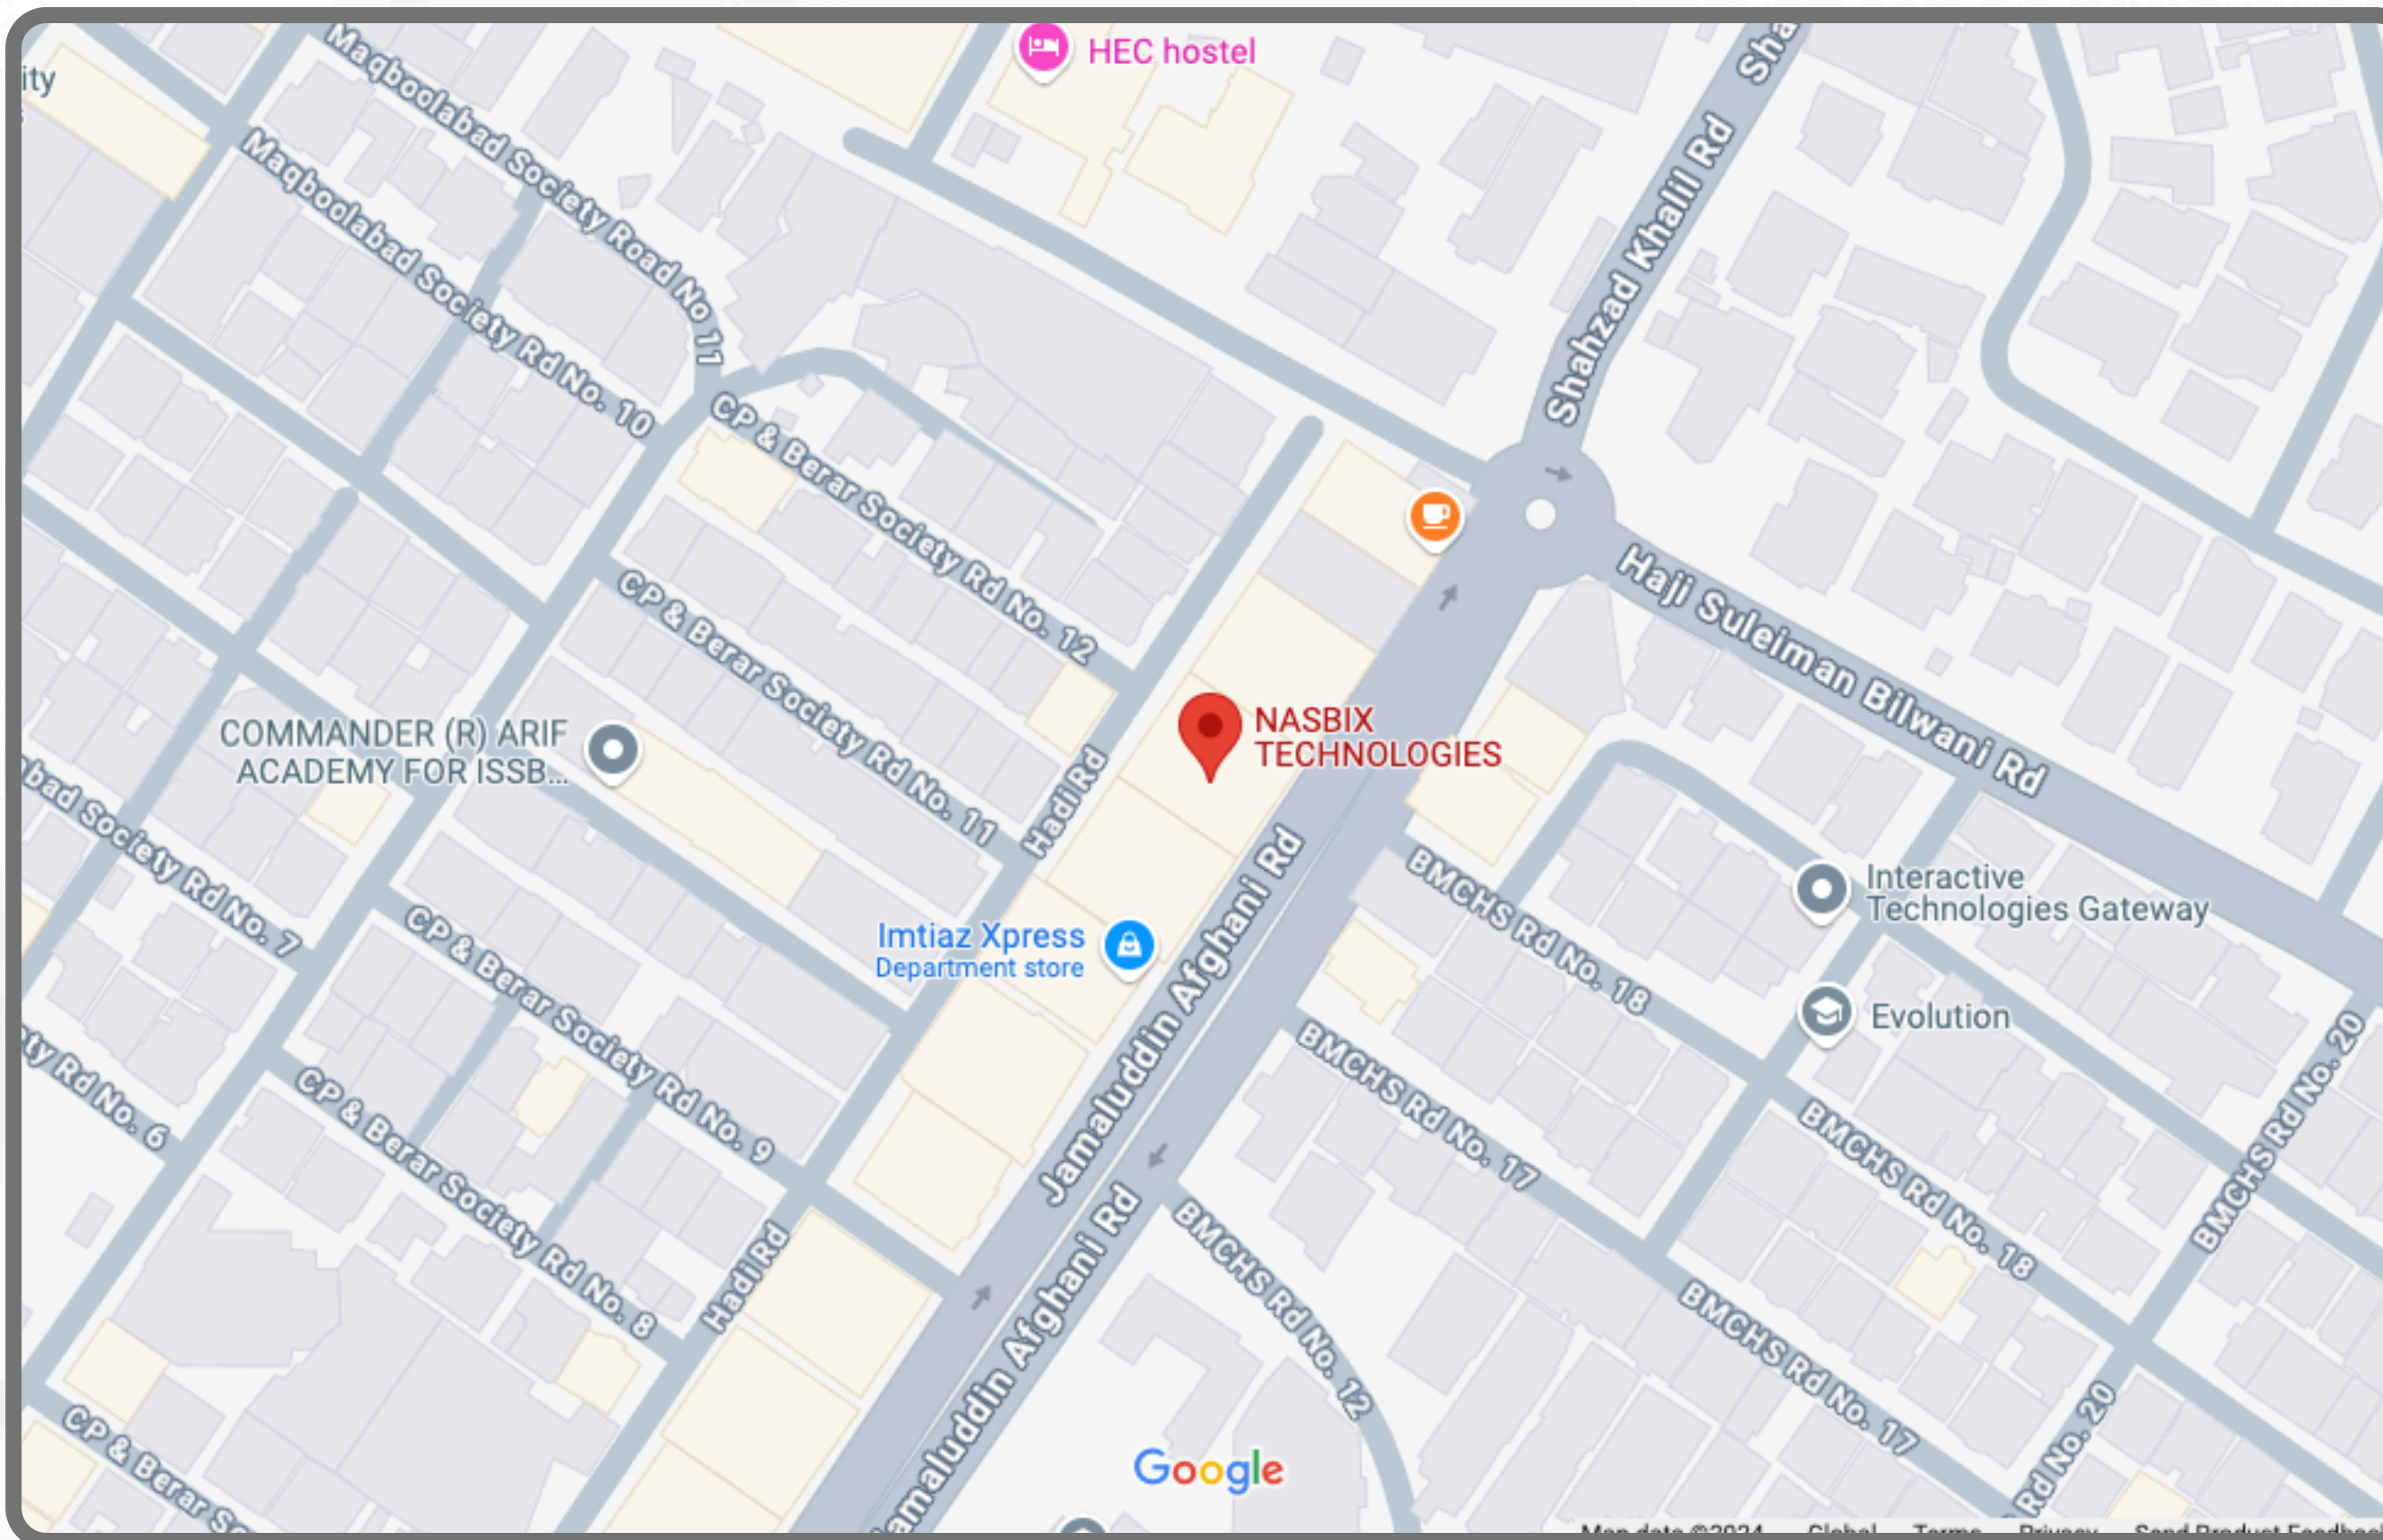

I was having a hard time finding good programmer, I decided to try 2 coding Company. They was way over the other Company in Term of service and Communication.

CEO – Kashif Khan, MAX MAX

I have used them for several projects – a mixture of WordPress responsive sites. All their work is delivered quickly, to current best practice standards and to a high quality.

CEO – Dr. Usman, Bantva Jewellers
